

## Powdered Fondant

### Ingredients:

	kg
Flemings Powdered Fondant	5.000
Water	0.650

### Method:

- Place water into mixing bowl and slowly add Powdered Fondant, mix together on slow and scrape down until all powder is dissolved.
- Heat to around 45-47°C and use straight away.
- This will give a high glossy finish to the products, if a softer icing is required additional water could be added.
